Year-over-year workforce summary

YoY% compares each fiscal year with the one before

Fiscal Year	Headcount End	Hires	Leavers	Attrition Rate	Leavers YoY %	Headcount YoY %
FY2014	208	58	12	6.5%		
FY2015	237	45	16	7.2%	33.3%	13.9%
FY2016	221	12	28	12.2%	75.0%	-6.8%

Attrition rate by department and fiscal year

Leavers ÷ average headcount. Small teams swing hard: 1 leaver in Admin Offices is about 20 %

Department	FY2014	FY2015	FY2016
Admin Offices	0.0%	20.0%	0.0%
Executive Office	0.0%	0.0%	0.0%
IT/IS	0.0%	8.0%	16.9%
Production	7.1%	5.7%	14.5%
Sales	9.3%	7.7%	0.0%
Software Engineering	0.0%	23.5%	0.0%
Total	**6.5%**	**7.2%**	**12.2%**

Why people left

Leavers in the selected fiscal year by reason, voluntary vs involuntary

Overdue & Action Queue

What must be finished now, and whose job is it?

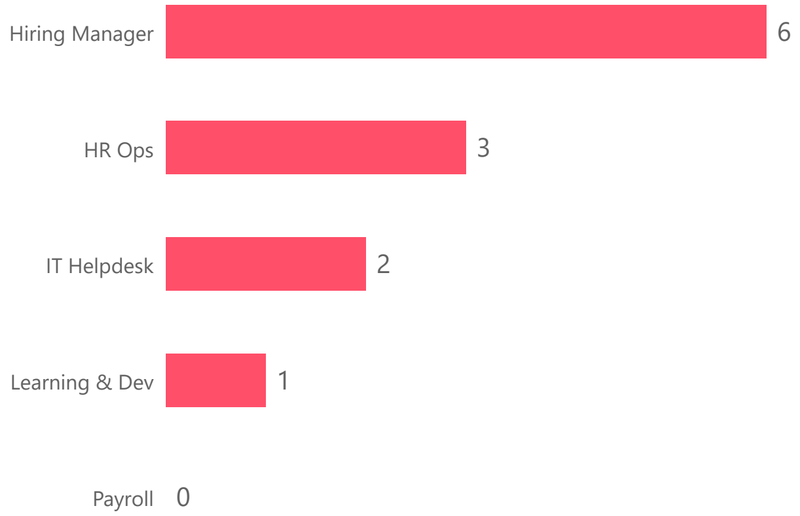

Department: All

As Of Date: 30 Sep 2016

Overdue Now	Overdue Rate	Due in the next 30 days
Open tasks past their due date, all years	Overdue ÷ tasks done or overdue, all years	Open tasks due 1-30 Oct 2016
12	1.0%	6

Overdue tasks by owner team

The owner team is accountable for finishing each task

Action queue: overdue onboarding tasks

Oldest due date first. Every row needs to be completed or closed.
Tasks for employees who left are closed as Cancelled and never show as overdue

The action queue and upcoming tasks list employees by name, so they are left out of the public version.

Coming up: due in the next 30 days

Not overdue yet. Finish these to keep the queue from growing

The action queue and upcoming tasks list employees by name, so they are left out of the public version.

Onboarding Trends

Are we onboarding on time, and does it relate to who leaves?

Fiscal Year: FY2016

Department: All

As Of Date: 30 Sep 2016

Overview | **By Employee**

On-time Rate
Done on or before the due date ÷ tasks done or overdue, selected fiscal year

88.3%

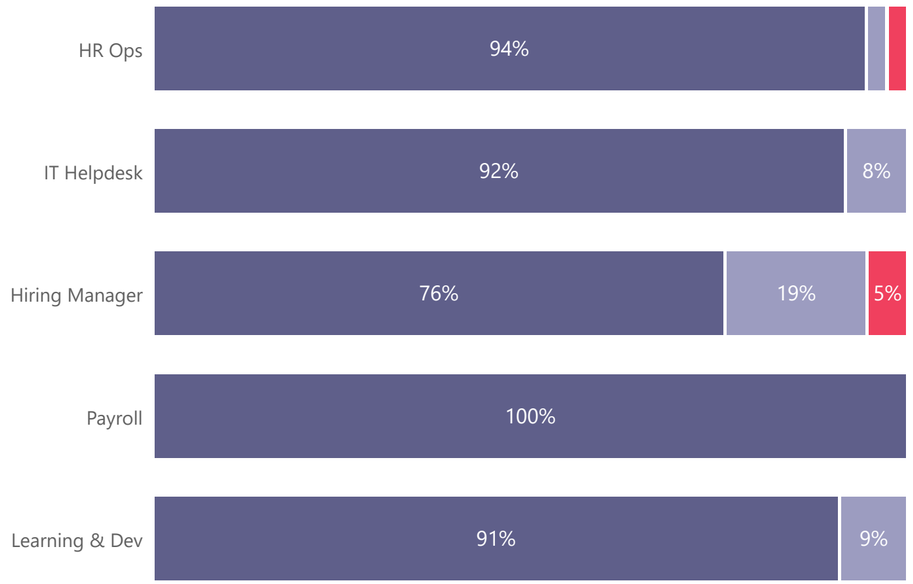

Late Rate
Done after the due date ÷ tasks done or overdue, selected fiscal year

9.2%

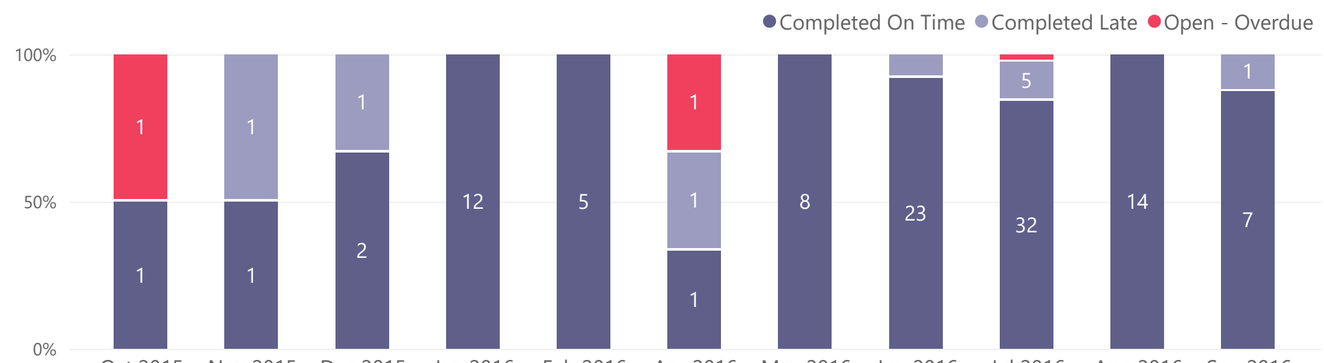

Overdue Rate
Still open the due date ÷ tasks done or overdue, selected fiscal year

2.5%

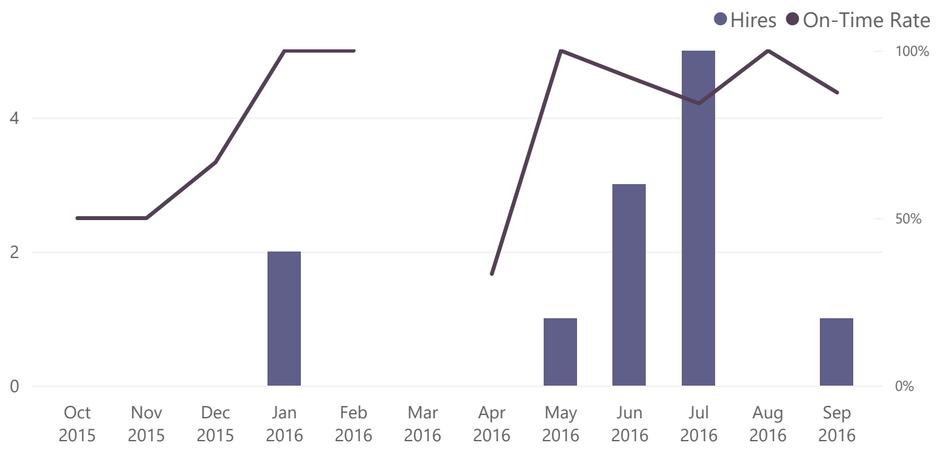

Task outcomes by owner team
Share of tasks done on time, done late, or still overdue. Each bar adds up to 100%

Onboarding task outcomes by due date
Share of tasks due in each period, by outcome as of 30 Sep 2016. Months of selected fiscal year.

Do busy hiring periods hurt onboarding?
Bars: hires in each period. Line: on-time rate for tasks due in that period. Months of the selected fiscal year

New-hire retention
Only 3 of 103 new hires left within 12 months, too few to link to onboarding quality.

Hire FY	Hires	Left within 1 yr
FY2014	58	0.0%
FY2015	45	6.7%

Attendance Submissions

Did every department send its weekly attendance?

Fiscal Year: FY2016

Department: All

As Of Date: 30 Sep 2016

Attendance on time

Weekly reports sent by the Monday deadline ÷ reports expected

85.9%

Missing submissions

Department-weeks with no attendance report at all

16

Weeks every department was on time

Out of the weeks in the selected fiscal year

19

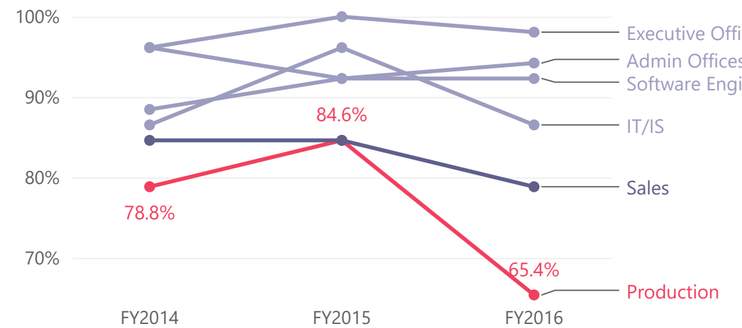

On-time submission rate by department and month

About this report

What do these numbers mean?

As Of Date
30 Sep 2016

Data. Workforce data is the public Kaggle *Human Resources Data Set* (Huebner). Onboarding tasks and weekly attendance are synthetic, generated from the real hire and termination dates.

The synthetic data was generated with three built-in assumptions. The patterns they create are illustrative, not findings:

1. **Large hiring batches slow support teams.** When 8 or more people start on the same day, IT Helpdesk and HR Ops tasks are more likely to be late. This is why IT Helpdesk's on-time rate dips in FY2015 (Onboarding Trends).
2. **Managers who lose team members fall behind on reviews.** After a departure, that manager's 30, 90 and 180-day reviews are more likely to slip. This is why Hiring Manager has the most overdue tasks (Overdue & Action Queue).
3. **Production submitted attendance less reliably in FY2016.** This is why Production's on-time submission rate drops that year (Attendance Submissions).

Report rules.

- Time charts show the months of the selected fiscal year
- Charts comparing years show all years and say so in their subtitle.
- Overdue & Action Queue shows everything as of today, across all years.

As-of date. All figures are as of 30 Sep 2016, set by the AsOfDate parameter. In production this would be the refresh date.

Data-quality note. Two leavers have a free-text reason that contradicts their HR status (one 'attendance' and one 'performance' exit marked voluntary). The report uses the HR status field.

Refresh steps:

1. Run HR_ETL_Pipeline in Power Automate Desktop.
2. Open this file → Home → Refresh.
3. Check the QA Checks page shows all zeros.

Term	Rule
Accountable tasks	Completed on time + completed late + open overdue: the tasks that are done or should be done.
As-of date	Fixed at 30 Sep 2016, stored once as the Power Query parameter AsOfDate. No TODAY() anywhere.
Attendance submission	Due the Monday after the week-ending Friday. On Time, Late, Missing, or Not Yet Due (the due date is after the as-of date).
Attrition rate	Leavers ÷ average headcount, where average = (start + end) ÷ 2. Shown for fiscal years; monthly views show counts only.
Cancelled	The employee left before the task was due or done; the task was closed at offboarding.
Days overdue	Days from the due date to the as-of date, for tasks still open past their due date.
Employee onboarding status	Left Company, then In Progress - Has Overdue, then In Progress - On Track, then Onboarding Complete (the first one that applies).
First-year attrition	Share of a hire cohort who left within 365 days. Only cohorts with a full year elapsed (hired on or before 30 Sep 2015).
Fiscal year	1 Oct to 30 Sep, named by the year it ends: FY2016 = 1 Oct 2015 to 30 Sep 2016. Quarters: FQ1 = Oct to Dec … FQ4 = Jul to Sep.
Headcount bridge	Start headcount (day before the period) + Hires − Leavers = End headcount.
Headcount on a date	Hired on or before the date, and either not terminated or terminated after it.
Leaver	Termination date inside the period and on or before the as-of date. Later terminations count as active.
On-Time / Late / Overdue Rate	Each outcome ÷ accountable tasks; they add up to 100%. For the selected fiscal year, except Overdue & Action Queue and the By employee view, which show all years.
On-time submission rate	On Time ÷ (On Time + Late + Missing).
Overdue	Open and due date before the as-of date. A task due on the as-of date is not yet overdue.
Task outcome	Exactly one of: Completed On Time, Completed Late, Open - Overdue, Open - Not Yet Due, Cancelled.
Voluntary / involuntary	Taken from EmploymentStatus (Voluntarily Terminated / Terminated for Cause).
Which date counts	Hires by hire date, leavers by termination date, tasks by due date, attendance by week-ending date.
